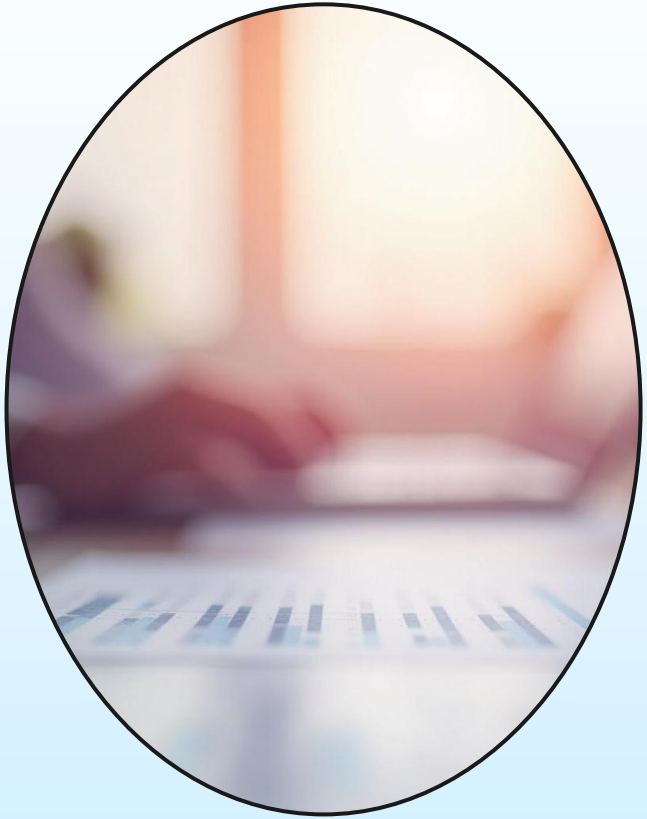
Big Mart Sales

Quarterly performance and strategic insights for retail optimization

Introduction

Overview of sales performance and strategic priorities.

This presentation summarizes key metrics, recent trends, and recommended actions to improve profitability and customer satisfaction. Focus areas include **revenue growth**, inventory efficiency, and product mix optimization.



01

Sales Analysis

Revenue Trends

Recent quarterly revenue snapshot and drivers.

Revenue increased by 6% year-over-year driven by higher transaction volume and targeted promotions. Monitor store-level variance and seasonal effects to sustain growth while controlling promotional spend.

Product Performance

Top and underperforming categories with actionable steps.

Identify high-margin winners and slow-moving SKUs. Implement assortment adjustments, targeted promotions, and inventory rebalancing to improve turnover and margins.

Seasonal Variation

Sales seasonality overview and implications.

Sales peak in Q4 and during major holidays, while Q2 shows softness. Adjust buying plans and promotion calendars to align with predictable demand shifts and reduce markdowns through timely clearance.

01

Store Strategy

Inventory Optimization

Approach to balancing stock and service levels.

Maintain optimal turnover by segmenting SKUs, setting *safety stock* by store, and using demand forecasts. Implement cycle counts and automated reorder triggers to reduce stockouts and excess inventory.

→

Pricing & Promotions

Plan to drive revenue while protecting margins.

Use elasticity analysis to target promotions to price-sensitive segments. Prioritize **high-margin** items for full-price sales and deploy short, measured discounts to accelerate slow movers without eroding brand value.

Store Layout Impact

How layout influences purchase behavior and conversion.

Optimize product adjacency and traffic flow to increase basket size. Test endcap placements and signage in pilot stores, measure lift, and scale successful layouts to improve impulse sales and dwell time.

Conclusions

Summary and next steps.

Focus on aligning promotions with seasonality, improving inventory processes, and optimizing store layouts to drive sustainable growth. Prioritize pilot tests, monitor KPIs, and scale initiatives that deliver **measurable lift**.
